

Native Habitat Restoration

Capability Statement

Greg Parr, Owner | (570) 762-2201 | gregparrs@gmail.com | nativehabitatrestoration.org | Northeast Pennsylvania
Pennsylvania field contractor for habitat restoration, forestry mowing, burn-prep, invasive species control, drainage-basin naturalization, tree planting, and sensitive-area land management.

CORE COMPETENCIES

Forestry mowing and mechanical brush clearing for firebreaks, right-of-way access, site preparation, and overgrown multi-acre parcels.

Native habitat restoration, preservation, meadow establishment, riparian and wetland support work, and tree planting with protective tubes.

Invasive species and vegetation control using lightweight mechanized equipment plus backpack spraying for sensitive and wetland areas.

Stormwater and drainage-basin naturalization field execution coordinated with the client project professionals where engineered plans or permit documents are required.

DIFFERENTIATORS

Owner-led field execution by a conservationist, forester, and farmer with a 40-year engineering background applied to restoration work.

Equipment mix suited to rough, soft, wet, and access-limited sites without defaulting to heavy disturbance.

Experience serving commercial, municipal, conservation, agricultural, school, utility, solar, and multi-acre private landowner sites.

CREDENTIALS AND VERIFIED PUBLIC FACTS

Education: Engineering Management, B.S. (Wilkes College); AS Engineering (Penn State).

Other credentials: Federal Bridge Inspection; FEMA Disaster Manager.

PA pesticide applicator categories listed for this operator: 5 Forest Pest Control; 6 Ornamental & Shade Tree; 9 Aquatic; 10 Right of Way & Weeds; 23 Park/School Pest Control.

SELECTED PAST PERFORMANCE

1,000+ Native Trees Planted: over 1,000 native trees grown, donated, planted, tubed, and protected across 2025-26 in Northeastern Pennsylvania.

Firebreak & Brush Clearing: forestry mowing for controlled-burn preparation, including dozens of acres of firebreaks and brush clearing in Northeastern Pennsylvania.

Prescribed Burn for Habitat Restoration: controlled burn support inside mechanically cleared firebreaks to reset an overgrown field and trigger native regrowth.

All-Season Forestry Mowing: tracked forestry mowing through thick brush and winter conditions for commercial site-prep schedules.
